MANAGED SECURITY AND ADDITIONAL SERVICES

Digital Freedom.
Trusted Protection.

Full organization vulnerability inventory and 24/7 MDR in hours from a Microsoft solution partner with Advanced Specialization

For mid-size and enterprise-level businesses, cybersecurity must be agile, scalable, and always on. Our Managed Extended Detection & Response (MXDR) service is verified by Microsoft. Including a 24/7 Security Operations Center (SOC) we deliver real-time threat detection and rapid incident response tailored for fully cloud-based environments. With our additional services, we protect your digital assets wherever they reside. **Stay resilient, stay compliant — all in the cloud.**

White Hat MXDR

Free initial consultation
Initial assessment
Monthly vulnerability reports – including assessment, vulnerability inventory and recommendations
Onboarding in 4 hours for Microsoft solutions
360° endpoint protection – for all endpoints, including desktop, server, mobile endpoints, IoT, container, databases or web applications
M365 Security
Azure Security
Threat hunting
Incident prevention guarantee – free incident response
Progressive discount for White Hat cyber services

White Hat MSS

Everything included in **MXDR**

+

Regular penetration testing
Regular phishing tests
Security Awareness trainings
Secure coding training
WHCD enterprise defence training
CISO support
ISMS development
ITS consultancy
Honeypot solutions
Forensics investigations
Threat intelligence

White Hat additional services

Rapid Incident Response

In case of a cyberattack, we can connect **remotely within 2 hours** and be on-site **within 12 hours anywhere** in the European region.

Guaranteed Incident Response

The service includes incident detection, digital forensics, and a customizable 24/7 availability model that can be **pre-purchased** according to your specific needs.

Penetration Testing

Vulnerability assessment
Hardware, IoT assessment
Web app pentest
API pentest
Mobile app pentest
Desktop app pentest
Internal infra assessment
External infra assessment
Adversary simulation
Phishing simulation

Managed Cyber Threat Protection

Through **personalized reporting** and continuous monitoring, we help protect your organization from cyberattacks before they occur.
Continuous **dark web monitoring** and proactive **threat analysis** under a **24/7 SLA.**

Governance, Risk & Compliance

NIS2 compliance
DORA compliance
ISO 27001 audit prep
BCP-DRP creation and maintenance
IBF-as-a-Service
CISO support
Table Top Exercises

VULNERABILITY ASSESMENT AND PENETRATION TESTING SERVICES

Think like an adversary – act like a white hat.

Our team of IT security experts and researchers apply their **extensive knowledge** of cyber security best practices and standards and the **hands-on experience** of their national security past to ensure that **mission-critical systems are reliably protected** from all **known and emerging threats**. Penetration testing, vulnerability assessment and inventory and deep-diving research to help you calculate risks by knowing your pivot points, reduce your attack surface and mitigate the risk of security breaches.

External and Internal Network Penetration Testing

Settings Goals and Rules
Planning · Info Gathering
Discovery · Attack
Reporting · Hardening
Retest

Web App Penetration Testing

Info Gathering
Configuration Management
Secure Transmission
Authentication
Session Management
Authorization · DoS
Business Logic
Cryptography

Vulnerability Research

Fuzzing • Focused and deep analysis • applicable to specific system, framework, protocol or algorithm

Mobile App Security Testing

Authentication
Communication
Cryptography
Dependencies
Tampering

Clear and flexible schedule, constant communication and immediate escalation of uncovered vulnerabilities

- Reconnaissance, analysis of the attack surface
- Penetration testing and vulnerability research
- Reporting, presentation, development of Proof-of-concept
- Prioritizing potential pivot points, flaws and risk factors based on criticality, probability and threat level – according to industry standards and best practices
- Estimation of the product security risk, recommendations for hardening and remediations with explanations, assist in implementation upon request
- Retesting, verifying correct implementation and effect of remediation measures

MANAGED CYBER THREAT INTELLIGENCE SERVICES

Think like an adversary – act like a white hat.

Cyber Threat Intelligence turns cyber threat data into actionable intelligence, helping organizations predict, prevent and respond to attacks before they strike.

OSINT Investigation

This service is crucial for cyber incident response, attribution, fraud investigation, and proactive threat hunting.
Comprehensive data analysis
Advanced correlation techniques
Legally compliant practices

Dark & Deep Web Monitoring

Our approach enables organizations to identify breaches faster and respond with greater confidence.
Stealer log monitoring
Ransomware group monitoring
Hacker discussion monitoring

Brand & Reputation Monitoring

Monthly Threat Landscape reports
Impersonated Social Account detection
Compromised device and credential detection
Potential phishing monitoring
Fake and malicious app detection

Attack Surface Monitoring

This solution supports vulnerability management, red team preparation, and compliance efforts.
Sensitive file disclosure detection
Misconfiguration monitoring
Shadow IT discovery
Vulnerability monitoring

Supplier Risk Monitoring

Strengthen your organization's resilience against indirect threats and maintain compliance with frameworks like NIS2 or ISO 27001.
Continuous vendor surveillance
Risk scoring and contextual insights
Automated alerts and incident response

VIP Monitoring

This service is ideal for executives, board members, public officials, celebrities, and anyone exposed to targeted digital threats.
Social media & public data surveillance
Real-time threat alerts
Discreet and secure reporting

Our team collects and processes information in the following languages: **English, Hungarian, Russian, Dutch, Serbian, Croatian, Montenegrin, German** + additionally we are cooperating with professional translators.

24/7

True 24/7 managed service with 24 hours SLA

EU and **NATO "Secret!" level clearance** for all team members

- Strategic intelligence
- Tactical intelligence
- Operational intelligence
- Free initial consultation
- Industry- and country-based threat monitoring

On-demand services

- Executive / complete threat assessment
- Private Investigation

ALKOOHEJI INFOTECH الكوهجي انفوتك

WHCD ENTERPRISE DEFENSE COURSE

Think like an adversary – act like a white hat.

Practical, hands-on training that teaches teams how to detect, contain and investigate real-world cyber incidents — from preparation to full forensic analysis — using industry tools and lab exercises.

University course

Contact hours / seminars
bi-weekly for 14 weeks

Trainings for companies

daily remote / onsite sessions
and deep-dive forensic
theoretical and practical tasks
duration: 2-4 weeks

Training for governmental clients

daily remote / onsite sessions
Customizable subject and topics
duration: 2-6 weeks

Who should attend

- Incident response teams, SOC analysts, DFIR practitioners
- IT / sysadmin and security ops staff (Windows / Linux)
- Managers who must coordinate incident handling and communications
- University students studying in cybersecurity programs

Key modules

- Intro to Incident Response
- Pre-incident Preparation (Tech)
- Pre-incident Preparation (Org)
- Initial Response
- Case Studies
- Digital Forensics Basics
- Forensic Duplication
- File System & Log Analysis
- Storage Recovery
- Platform Forensics
- Memory Forensics
- Live Data Collection
- Network & Traffic Forensics
- Email, Browser & Office Forensics
- Router Forensics

Training format & labs

- Each module followed by **hands-on labs** using forensic images, memory dumps, logs and extracted artifacts.
- Mix of instructor demo + guided exercises to ensure skill transfer.
